

Add a boat on the water

UniAR

- Unifying understanding, generation and editing via auto-regressive modeling ✨
- A single shared visual tokenizer to unify the representation space ✨
- Bitwise quantization of multi-level features
- Parallel bitwise prediction mechanism to speed up inference
- Three-stage training procedures
- Achieving 32x or even 64x compression ratio

Change the background to a beach

Change the goat into a rabbit

Change the color of the toy to blue
